CORDLESS WOOD BLINDS

ULTIMATE™ NORMANDY® CORDLESS WOOD BLINDS

EARTH FRIENDLY & NATURALLY BEAUTIFUL

It's a mission that many of us embark upon: to relish the finer things and make sustainable choices that lead to a healthier tomorrow. At Norman® we've taken this credo to heart. Our premium Phoenix Wood® originates from “miracle” forests that rejuvenate every 7 years after harvest. While the premium hardwood is exquisitely grained and durable, it is also a sustainable choice.

EXPECT MORE FROM YOUR BLINDS

QUARTER SAWN SLATS

Unlike cheaper plain sawn slats that are cut straight-across, Ultimate™ Normandy® slats are milled from a quartered log and then cut perpendicular to the grain. With more consistent graining, Normandy blinds are more stable and can resist cupping and warping.

MODERN AESTHETICS WITH RUSTIC CHARM

The finishes in this collection are eco-friendly stains made from natural plant oils and vegetable waxes, free from common paint and stains' harmful substances. They penetrate deeply, for durability and rich color that goes beyond the surface and protects against degradation over time.
